

washington local schools™
Individual Attention. Infinite Opportunities.

Dear Parents / Guardians:

The Washington Local Schools is committed to providing high quality instruction, data-driven decision making, collaboration and the ability to use technology as a learning accelerator. The Washington Local Schools is now making an online suite of tools called Google Apps for Education (GAFE) available to all students. These tools are also sometimes known as Google Docs. This suite of tools includes online word processing, spreadsheets, presentations, an e-mail account, calendar and many other instructional and / or productivity tools. GAFE also enables students to share documents with other students and to submit work to teachers online.

The Washington Local Schools requires written parent/guardian consent for students to have a GAFE account. Parental consent is voluntary. However, students who do not have permission to use GAFE will not be able to create or share assignments online through GAFE.

These online tools will be available to students anywhere there is a computer with an Internet connection.

The student's login name to GAFE will follow this pattern:

John Smith, Student ID 123456 = JSmith3456@WLSStudents.org

The login password will be the same as the Student's PowerSchool login.

Please note that the use of GAFE by students is subject to the previously signed Acceptable Use Policy (AUP.) You can find the information about the AUP at: <http://www.wls4kids.org/District/2789-AUP.html>

Please sign and return the form below so we can create a
Google Apps for Education Account for your student

Student Name: _____ Student ID: _____

_____ I give permission for my student to be issued a Google Apps for Education Account
